HARSH WARDHAN

Web Developer | WordPress Developer | IT & Digital Operations

PROFESSIONAL PROFILE

Fresher with hands-on experience building and managing live web projects. Skilled in WordPress, SEO, Google Search Console, website QA, content operations, hosting, deployment and AI-assisted workflows. Strong focus on clean mobile experiences, reliable website operations and practical problem solving.

INDEPENDENT WEB PROJECT EXPERIENCE

RSSBUpdates.com | Rajasthan Government Updates Portal

rssbupdates.com

- Built and manage the WordPress site structure for recruitment, results, admit cards, answer keys and related updates.
- Handle SEO workflows including sitemap, URL inspection, indexing checks, Rank Math setup and internal content structure.
- Test mobile/desktop UI, plugins, links, publishing workflows and content accuracy; identify and resolve website issues.

RajasthanMandiBhav.online | Agriculture & Mandi Information Portal

rajasthanmandibhav.online

- Develop and manage a Rajasthan-focused mandi information website with a mobile-first farmer-friendly structure.
- Plan mandi/crop content architecture, data-update workflows, page organization, performance and SEO requirements.
- Perform website testing, data verification and feature planning for scalable daily content operations.
